Docket No.: E-41422

I hereby certify that this correspondence is being deposited with the United States Postal Service with sufficient postage as first class mail in an envelope addressed to the Commissioner for Patents, P.O. Box 1450, Alexandria, VA 22313-1450, on the date indicated below.

MAIL STOP: APPEAL BRIEF-PATENTS

By: 

Date: March 24, 2006

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE
Before the Board of Patent Appeals and Interferences

Applic. No. : 10/014,265 Confirmation No.: 2778

Inventor : Rolf Brück, et al.

Filed : November 7, 2001

Title : Combustion Engine Assembly with a Small
Volume Catalytic Converter

TC/A.U. : 1764

Examiner : Alexa Doroshenk Neckel

Customer No. : 24131

Hon. Commissioner for Patents
Alexandria, VA 22313-1450

REPLY BRIEF

S i r :

In response to the Examiner's Answer dated October 2, 2006,
kindly consider the following remarks:

Application No. 10/014,265
Reply Brief, dated 12/4/06

RECEIVED
CENTRAL FAX CENTER
DEC 04 2006

Remarks:

On page 6 of the Examiner's answer, the Examiner alleges that "appellant argues that none of the references, individually, disclose having an effectiveness of more than 98%".

As will be seen from the following remarks, the Examiner's allegation is not accurate. Appellants' arguments are directed to the combination of the references and not toward the references individually. The arguments in the appeal brief deal with the combination of the references and do not attack the references individually. Accordingly, the Examiner's allegations that appellants' arguments attack the references individually, are not accurate. Therefore, the honorable Board is kindly requested to disregard the Examiner's comments.

On page 7 of the Examiner's answer, the Examiner alleges that "it is the examiner's position that the combination of Abe et al., Machida et al. and Chalasani et al. result in a device with all of the same structural properties as those recited in the claims; therefore such a device would inherently possess the same effective properties as the claimed device."

Application No. 10/014,265
Reply Brief, dated 12/4/06

As will be seen from the following remarks, the Examiner's
allegations are not correct.

MPEP § 2112 (8th edition, 1st revision) states that:

**EXAMINER MUST PROVIDE RATIONALE OR
EVIDENCE TENDING TO SHOW INHERENCY**

The fact that a certain result or characteristic may
occur or be present in the prior art is not sufficient to
establish the inherency of that result or characteristic.
In re Rijckaert, 9 F.3d 1531, 1534, 28 USPQ2d 1955,
1957 (Fed. Cir. 1993) (reversed rejection because
inherency was based on what would result due to optimization
of conditions, not what was necessarily
present in the prior art); *In re Oelrich*, 666 F.2d 578,
581-82, 212 USPQ 323, 326 (CCPA 1981). "To establish
inherency, the extrinsic evidence 'must make
clear that the missing descriptive matter is necessarily
present in the thing described in the reference, and
that it would be so recognized by persons of ordinary
skill. Inherency, however, may not be established by
probabilities or possibilities. The mere fact that a certain
thing may result from a given set of circumstances
is not sufficient.' " *In re Robertson*, 169 F.3d
743, 745, 49 USPQ2d 1949, 1950-51 (Fed. Cir. 1999)
(citations omitted)

As discussed in MPEP § 2112, a limitation recited in a claim
that is not expressly or implicitly disclosed in a prior art
reference is inherently disclosed therein if, and only if,
the "missing" limitation is *necessarily present* in the prior
art, and that it would be so *recognized by persons of
ordinary skill*. The principles of inherency require that the
inherency be absolute, and not *probabilistic*. As far as
Applicants were able to ascertain, there is no disclosure or

Application No. 10/014,265

Reply Brief, dated 12/4/06

suggestion that with a combination of Abe et al., Machida et al. and Chalasani et al., it is **absolutely necessary** that the effectiveness be greater than 98%.

Furthermore, according to a sub-heading in MPEP § 2112, the "EXAMINER MUST PROVIDE RATIONALE OR EVIDENCE TENDING TO SHOW INHERENCY", i.e. the Examiner has the burden of proof (by a preponderance of the evidence) to show that a combination of Abe et al., Machida et al. and Chalasani et al. **necessarily** disclose or suggest purposefully the effectiveness be greater than 98%. Instead of offering factual evidence disclosing or suggesting an effectiveness of more than 98%, the Examiner made a statement without any factual support or *Official Notice*. The Examiner cannot simply be the devil's advocate postulating certain results or processes that may or may not occur or be present in the applied prior art and leave it up to Applicant(s) to show or prove the contrary. Accordingly, the Examiner has not shown that a combination of Abe et al., Machida et al. and Chalasani et al. **necessarily** discloses or purposefully suggests the effectiveness be greater than 98%. Therefore, the honorable Board is kindly requested to disregard the Examiner's comments pertaining to the combination of Abe et al., Machida et al. and Chalasani et al. inherently having effectiveness be greater than 98%.

Application No. 10/014,265
Reply Brief, dated 12/4/06

Based on the above-given remarks, the honorable Board is respectfully urged to reverse the final rejection of the Primary Examiner.

Respectfully submitted,

Alfred K. Dassler (52,794)
